**INSTALLATION OF
THE SINK PREPARING A
NEW COUTERTOP**

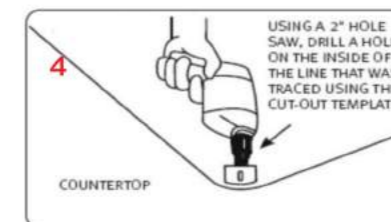

1 Trace the sink outline on the countertop (do not cut along this line.)

2 Draw a line 1 cm inside the sink outline.

3 Measure the cut-out line you just drew and compare to all dimensions (double check)

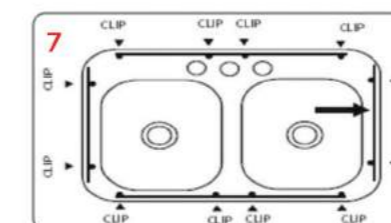

4 Using a 2" hole saw, Drill a pilot hole inside the cutting line.

5 Using a jigsaw, cut along the inside line to cut the opening in the countertop.

6 With sink in the upside down position, place a continuous and generous bead of silicone sealant around the entire perimeter of the rim. This serves as a watertight seal.

7 Lift sink, turn face up and lower into the countertop cutout opening. Wipe excess sealant from perimeter with a wet cloth

8 DRILLING TAP HOLE
9 Invert the Sink, Use the marking to Drill the Hole with Wood Cutting Bit
